

Commercial Name	INCI	Producer	Description
ImerCare® 90P, 120P, 190P, 270P, 400P, 700P, 800 P scrub, Sandyscrub	Perlite	Imerys	Perlite products are made from a volcanic glass which contains water in its inner structure. When heated rapidly, the steam produced expands the glass to form a foamed structure which can be used, when processed in fine controlled particles, in many different personal care products. This product shows high purity and abrasivity that enable it as the perfect alternative to the synthetic polyethylene microspheres for a natural and mild scrub.
ImerCare® PerlWhite	Perlite	Imerys	ImerCare® PerlWhite 19 is a perlite based product that has been specifically engineered to optimise its particle size and shape, making it an ideal gentle abrasive for toothpaste.
ImerCare® KaoBright	Kaolin	Imerys	ImerCare® KaoBright tailor made kaolin specifically designed as alternative to abrasive silica in toothpaste.
TIXOSIL 68	Hydrated silica	Solvay Silica Business	Microgranular silica with high dentin abrasivity.
TIXOSIL 73	Hydrated Silica	Solvay Silica Business	Polishing silicone with high dentin abrasivity.
TIXOSIL SOFTCLEAN	Hydrated silica	Solvay Silica Business	It is a new silica which allows a mild dentin abrasivity level while maintaining efficient cleaning power. This grade is particularly recommendable for children toothpastes or those for sensitive gums.
