

Commercial Name	INCI	Producer	Description
GALAXY 2932	Ethylhexyl Methoxycinnamate	Galaxy	It is an effective sunscreen, widely used (2.0-7.5%) in sunscreen products, and other skin-care formulations which offer sun-protection - products like creams, lotions, gels, colour-cosmetics and so on. It is suitable for hair-care products too and also used as sun-protection ingredient in toiletries. Being insoluble in water, Galaxy 2932 is an ideal sunscreen for waterresistant/ water-proof sun-protection formulations.
GALSORB AVOBENZONE	Butyl Methoxydibenzoylmethane	Galaxy	An oil-soluble UVA absorber. In combination with UVB absorbers, it offers broad spectrum protection against UV radiation.
GALSORB OCTOCRYLENE	Octocrylene	Galaxy	An oil-soluble UVB filter used in association with UVA or additional UVB absorbers for the creation of effective sunscreen formulations.
