

# Hymagic™-4D

## 4D Hyaluronic Acid

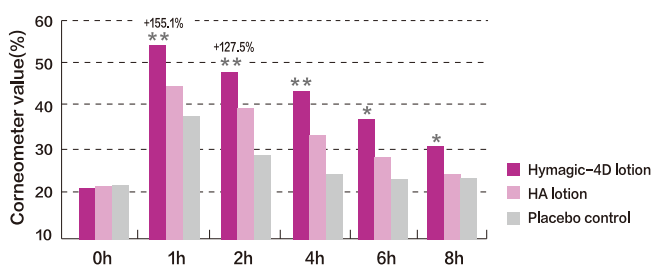

### The Secret for Skin Moisturizing

Hymagic-4D, a combination of four kinds of Sodium Hyaluronate (HA) with different properties, can build up and form a three-dimensional network and accurately target the different layers of the skin, to replenish water from outside and hold water from inside. In this way skin is moisturized and hydrated completely and improves in elasticity directly from within.

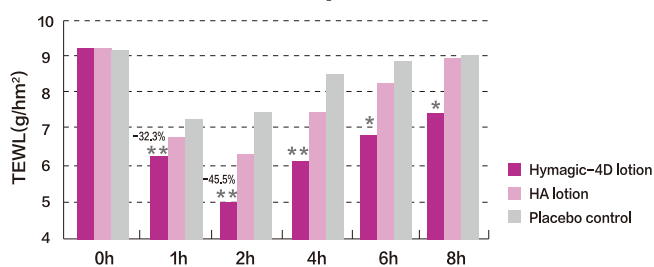

### [ Three-dimensional moisturizing ]

#### ► Increase skin hydration

#### ► Reduce water evaporation

Hymagic-4D, the molecular sponge for water-replenishing and water retention, can provide instantly three-dimensional moisturizing efficacy, and keep skin hydrated continuously while improving skin moisture enhancement from inside and making skin smooth and elastic.

### [ Introduction ]

**INCI name:** Sodium Hyaluronate Crosspolymer, Sodium Hyaluronate, Sodium Acetylated Hyaluronate, Hydrolyzed Sodium Hyaluronate, Pentyleneglycol, Ethylhexylglycerin, Aqua

**Application:** Skin care, Hair care products, etc.

**Recommend dosage:** 1%~10%
